

Wednesday

What does sharing equally mean?

Can we estimate how many they might have
in each bag?

Let's try again...

Have the oranges been shared equally? How do you know?

Let's practise some dividing.
You need 4 plates and 20 counters.

Put an equal number of counters on each plate.
Use all the counters.

How many counters on each plate?

You need 3 plates and 15 counters.

Put an equal number of counters on each plate.
Use all the counters.

How many counters on each plate?

You need 5 plates and 15 counters.

Put an equal number of counters on each plate.
Use all the counters.

How many counters on each plate?
